

School of Environmental Sciences

Postdoctoral Research Associate

Quantitative Social Research / Demography

Salary: £31,644 pa (Grade 7)

Full-time

We invite applications to work on the British part of the research project **Partner Relationships, Residential Relocations and Housing in the Life Course**. The three-year project will investigate the connections between partner relationships, residential relocations and housing in the Netherlands, the UK and Germany, using large survey data and applying methods of longitudinal data analysis. The project is funded by the Netherlands Organisation for Scientific Research NWO, the UK's Economic and Social Research Council and the German Research Foundation DFG under the ORA Plus scheme. Principal investigators are Professor Clara Mulder from the University of Groningen, Professor Michael Wagner from the University of Cologne, and Dr Hill Kulu from the University of Liverpool.

This is an excellent opportunity for an enthusiastic individual to work in an international team of researchers on a highly policy-relevant topic. You will work in close collaboration with Dr Hill Kulu. You will investigate the interactions between partner relationships and residential relocations in the UK, will contribute to comparative studies of the three European countries and will write up research results for publication in leading international social science journals. You will also help to organise a workshop and will be responsible for the design and update of the project webpage. You should have a PhD in a social science discipline (including statistics), experience in handling longitudinal data and conducting event history analysis. Good communication and management skills are essential. The post is available from 1 July 2014 until 30 June 2017.

The closing date for applications is **30th May 2014**

Informal inquires may be addressed to Dr. Hill Kulu; email:
hill.kulu@liverpool.ac.uk; telephone: + 44 151 794 2859
