

Projeto Temático: Observatório das Migrações em São Paulo

Title: Post-Doctoral Scholarship on Spatial Demographic Analysis

Field: Demography and related areas

FAPESP process number: 14/04850-1

Project title: Observatory of Migration in São Paulo: internal and international contemporary migrations in São Paulo State

(<http://www.bv.fapesp.br/pt/auxilios/87062/observatorio-das-migracoes-em-sao-paulo-migracoes-internas-e-internacionais-contemporaneas-no-estado/>)

Area of expertise: Demography

Principal investigator: Rosana Baeninger, Álvaro de Oliveira D'Antona and Jurandir Zullo

Unit/Institution: Population Studies Center (NEPO) - University of Campinas (Unicamp)

Abstract of the Thematic Project

The project continues the thematic project Observatory of Migration in São Paulo (Population Studies Center - UNICAMP), supported by FAPESP (process number 2009/06502-2) from 2009 to 2013. In this second phase of the study (2014 to 2018), the Observatory of Migration in São Paulo subject-matter emerges from the need to deepen the theoretical, methodological and empirical knowledge regarding the settings and the specificities which internal and international migration processes assume in different spaces of São Paulo's territory, considering the 'age of mobility'. The main objective of this project is to understand and analyze the changes in national and international migration processes to, from and within São Paulo State based on diversified migratory modalities. In an inter-institutional and interdisciplinary perspective, the project incorporates researchers from various academic backgrounds that dialogue with the migration phenomenon. From the institutional and academic perspectives, it integrates researchers from different higher education and research institutions of São Paulo State (UNICAMP-NEPO/CEPAGRI/IFCH/FCA, UFABC, Carlos Chagas Foundation, Coffee Museum and Immigration Museum).

In this thematic project, there are four research lines from NEPO that are interconnected for the study of migration: Spatial Mobility of Population;

Demography of Ethnicities; Population and Health; Population and Environment. Whether for the organization or the integration and analysis of the generated data, it is essential to systematize georeferenced bases and spatial analysis completion.

Profile of the applicants:

Applicants must have scientific training in demography, geography and related areas. It is essential to have prior experience with georeferenced sociodemographic databases (especially the processing of census data) and mastery on Geographic Information Systems (GIS) softwares and tools. More specifically, mastery on the ArcGIS platform (Desktop and Server) is expected.

Moreover, it is expected from the applicant motivation and ability to organize research tasks with independence and resourcefulness in the production of maps, report and scientific papers writing. More specifically, it is expected that the candidate will explore the potentialities of spatial analysis applied to migration and population mobility.

In their activities, applicants will interact with all members of the project during activities to be held in NEPO's facilities (Unicamp-Campinas), CEPAGRI (Unicamp-Campinas) and in the Center for Humanities and Social Sciences, CHS (Unicamp-Limeira).

Those interested in Post-Doctoral Scholarship in Brazil must submit the following documents in PDF (Portable Document Format) until May 1st, 2015:

- a) Complete and updated Curriculum Vitae, including List of Publications;
- b) Cover letter stating the reason for the interest in the scholarship and a brief report of your experience;
- c) Two recommendation letters.

The amount of the Postdoctoral scholarship in Brazil from FAPESP (PD-BR) is R\$6.143,40 (six thousand, one hundred and forty-three reais, and forty cents) and the scholarship term is twelve (12) months .

Selection process will take place in June 2015 and activities will start in July 2015. Applicants should be available for interview in June 2015.
