

**ASSISTANT RESEARCH DIRECTOR, EVANS CENTER FOR
IMPLEMENTATION AND IMPROVEMENT SCIENCES, Department of
Medicine, Boston University**

Tracking Code

8023/K1915

Job Description

Assume day-to-day responsibility of running new research Center for Implementation and Improvement Sciences. The goal of the new center is to be a methodological hub for the scientific evaluation of efforts to improve healthcare delivery.

The Assistant Research Director will play a major role in helping to shape & develop the new Center. Responsibilities will include both Center research and coordinator activities. Research responsibilities will involve the conduct of quantitative and/or qualitative analyses to assist in achieving generalizable insights from implementation of healthcare improvement projects. Coordinator responsibilities will involve scheduling speakers, meetings, managing budget, and interacting with key faculty, staff, and students.

Required Skills

Minimum of a Master's degree in a health-related field. Strong quantitative and/or qualitative data analysis skills. Excellent organizational and communication skills. Ability to work independently. Excellent interpersonal and leadership skills.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law. We are a VEVRAA Federal Contractor.
